AUMS

Billing Smart.

AUMS Billing Smart allows cyclical and mass sales of goods and services.

The solution is addressed to enterprises which bill their customers cyclically. It can also be integrated as an additional module with higher versions of AUMS Billing responsible for invoicing goods and services. For example the system can handle billing for:

- cable and satellite television subscription fees
- med care subscription fees
- school fees
- monthly parking fees
- newspaper subscription fees
- etc.

The above services may also be included as an element of convergent sales and issued on a single invoice together with electricity and/or natural gas billing. This simple and flexible billing configuration tool minimizes Time to Market as the implementation of new products or services requires no programming work.

AUMS Billing Smart is based on the market proven AUMS family portfolio. Owing to this, the solution offers AUMS Billing and CIS quality together with ease of configuration of billing of new goods and services. The solution is offered in SaaS model. In case of larger installations Asseco offers an on-premise implementation model.

Key benefits.

Cyclic and mass
invoicing

Simple and quick
configuration

Full Offer to Cash
process

Flexible configuration of goods
and services catalogue

Possibility to link invoicing
with electricity or gas

- Tax reports

AUMS Billing Smart

Installment sales:

- Establishment of installment plan
- Independent installments
- Installments included in the invoice

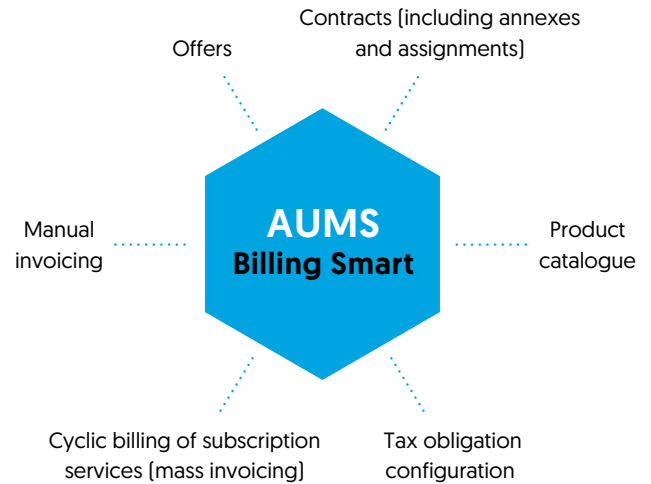

Debt collection:

- Debt collection process
- Debt collection search
- Debt collection documents

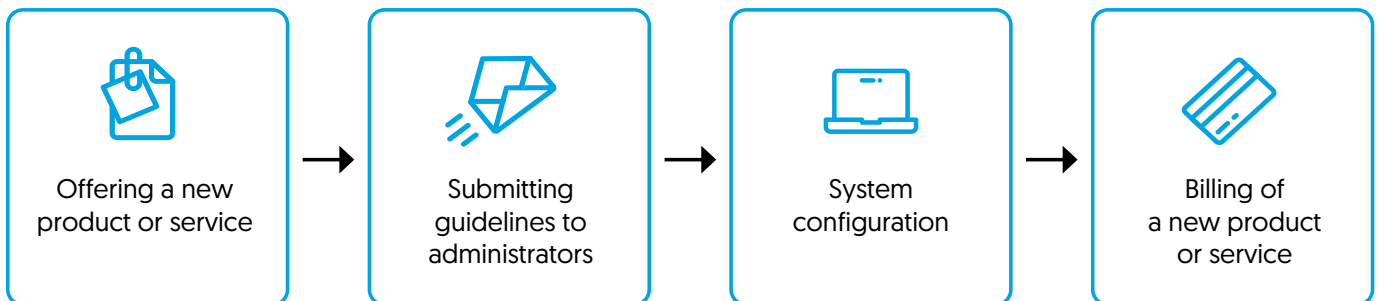

Cyclic and mass invoicing.

To bill a new product or service start by defining the new product. During the product configuration it is also possible to perform configuration for tax obligation. Prepared products are used for offers, where they are priced. Ready offers allow to issue a manual invoice, or to prepare a contract that will enable automatic mass and cyclic invoicing.

Time to Market minimization.

Thanks to the flexible configuration mechanism of goods and services, it is possible to launch the billing of a new product in **less than 1 hour** from time of submitting the guidelines to system administrators. Implementation of new products or services invoicing is possible without any programming needed.

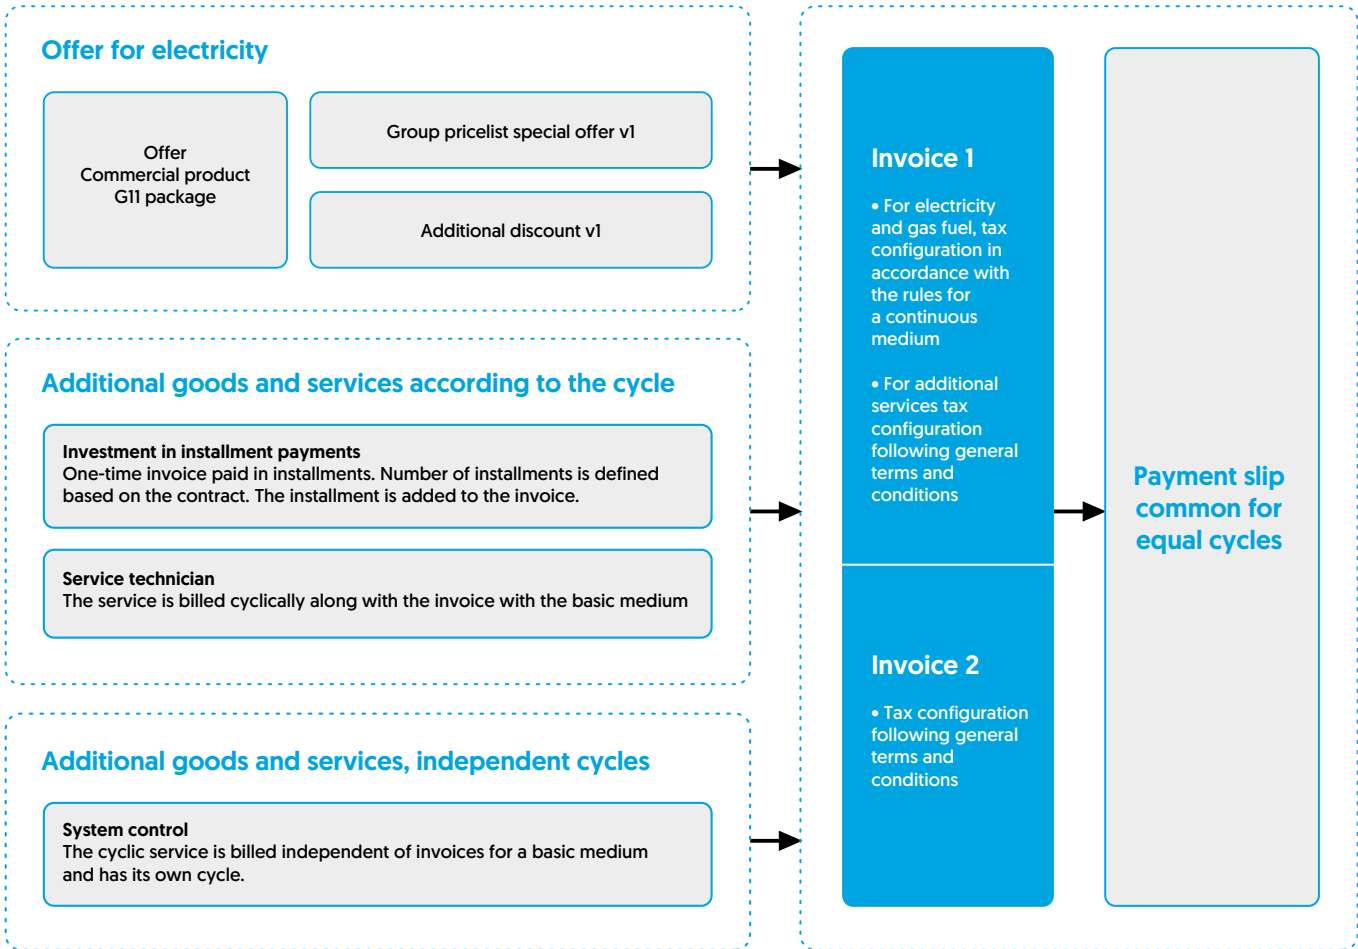

Offer to Cash process.

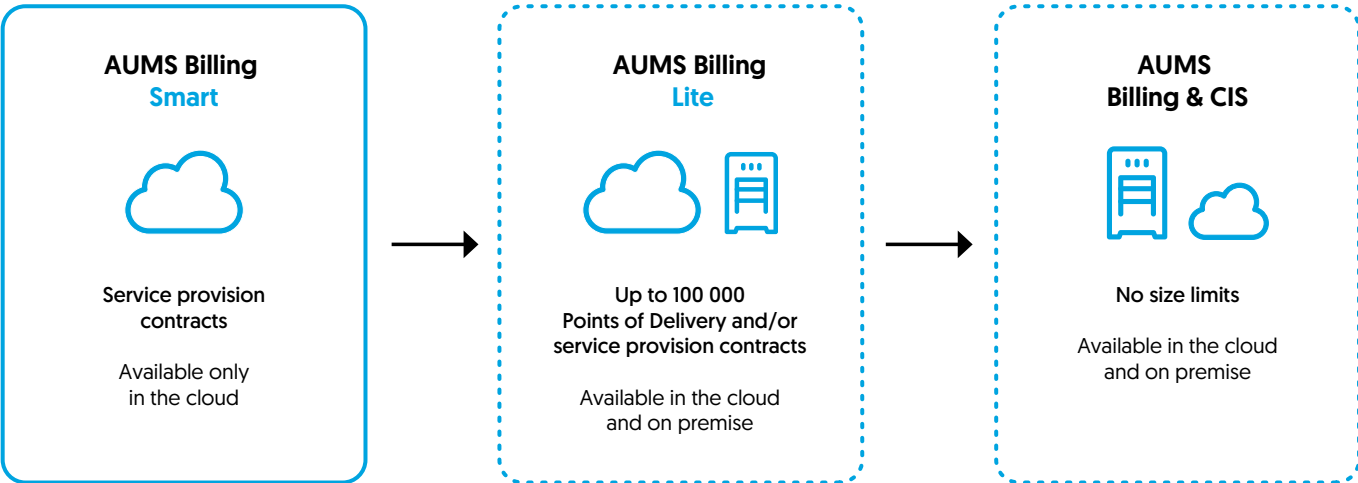

The AUMS Billing Smart system offers full support of the entire process of customer service and invoicing from the preparation of products and offers, including signing of a contract, invoicing and financial services as well as reporting and debt collection.

The possibility of convergent invoicing with electricity and/or gas fuel.

AUMS Billing portfolio.
